NEMHO COE QUILLAN: PRESS PLATE MANUFACTURER

Nemho CoE Quillan is a leading manufacturer of structured press plates, located in Quillan, France. Our production site at FORMICA has been producing **high-quality press plates for over 50 years**. Our plates are available in a wide range of finishes, including glossy and matte, woodgrains, and fantasy patterns. We can also produce any type of non-directional structure to meet your specific needs.

Our state-of-the-art production facilities allow us to offer excellent properties and precise etching for our structured plates. With decades of experience in this field, we have **hundreds of new patterns available**, and we can also adapt to meet your unique requirements.

At Nemho CoE Quillan, we are committed to providing the highest quality structured press plates and exceptional customer service. **Plate refurbishing** also plays a pivotal role in our operations. Refurbishing addresses damage caused by scratches or kinks on the surface of the press plate. Unlike de- and rechroming, reworking requires the plate to be restructured, which takes more time. Nonetheless, the result is equivalent to that of a new plate, enabling the plate to be used for several cycles before the steel is ultimately recycled.

Dual Gloss effect

DUAL GLOSS EFFECT

Elevate any texture with a striking gloss contrast, adding depth and dimension. Browse our selections or reach out to co-create this effect on your preferred design, blending innovation with elegance.

CREATIVE SYNTHESIS

Explore the art of blending diverse textures to create new, innovative designs. Whether it's merging organic with geometric, rough with smooth, or matte with glossy, share your vision with us. Together we'll embark on a journey to craft your unique texture synthesis. Your imagination, our expertise.

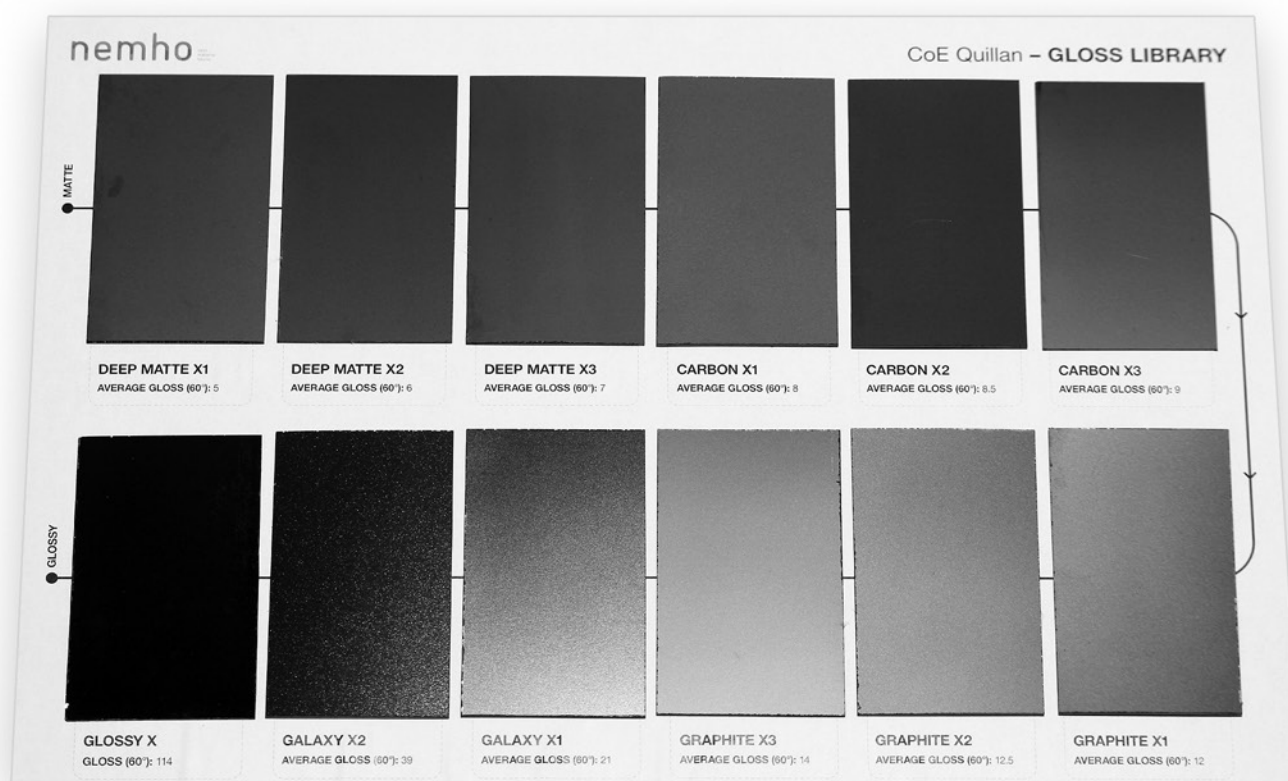

A VISUAL GUIDE TO GLOSS LEVELS

At Nemho CoE Quillan, our technology enables us to achieve a wide range of gloss levels, from the subtle depth of Deep Matte X1 to the reflective brilliance of Glossy X (see below). The accompanying panels demonstrate this versatility across various finishes, applicable to both flat and textured surfaces, including universal, woodgrain, stone textures, etc.

If you're keen to explore more or would like to receive a sample panel from our gloss library, please feel free to contact us. We're excited to share our innovations and assist with your specific needs.
